Hiring Manager
Apptronik
11701 Stonehollow Dr STE 150
Austin, TX 78758
United States

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer—robotics position at Apptronik. I recently came across your collaboration with NVIDIA and Mercedes-Benz, and your groundbreaking work truly inspires me with Apollo. The way Apptronik turns futuristic concepts into reality is commendable, and I am eager to be a part of this innovative journey.

Let me share a bit about myself – I've been immersed in robotics, from developing a robotic automation solution for fluid extraction to enhancing the Spot robot's autonomy. My work has always been about making robots more intelligent and helpful in real-world scenarios. Seeing how Apptronik is pushing the boundaries with Apollo, I'm excited about the potential of joining your team and participating in this exciting journey.

My experience in dynamic trajectory algorithms and object detection is a perfect match for enhancing Apollo's learning capabilities, especially with integrating NVIDIA's Project GROOT. With Apollo venturing into Mercedes-Benz manufacturing facilities, I'm eager to automate those physically demanding tasks and enhance the efficiency of the production line. I'm prepared to hit the ground running and significantly impact Apollo's journey, ready to contribute from day one.

My passion lies in building robots that work seamlessly alongside humans, a vision I see reflected in Apptronik's work. I'm excited to discuss how I can contribute to your team and help bring Apollo to new heights. I look forward to discussing how my skills and experiences align with Apptronik's goals.

Thank you for considering my application. I look forward to discussing my candidacy further in an interview.

Kind Regards,

Sai Sharan Thirunagari
Robotics Engineer
